Applications for Patents

From 18/01/2021 to 28/01/2021

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. In the case of a Convention application the Convention country and priority date(s) claimed are given in square brackets and where an application claimed the priority of an earlier application filed at the office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

The Cooking Cosy is a knitted saucepan cosy made of wool with an opening for the saucepan handle. It is expandable with an extendable cuff so can snugly fit small to large saucepans. Instead of simmering after bringing food to the boil, the saucepan can be removed from the cooker, placed on an insulating mat and covered in a Cooking Cosy which retains the heat and continues the cooking process. It takes approximately 5-10 minutes longer to cook food this way than conventional simmering therefore saves energy. Food cooking under the Cooking Cosy does not need attending to as it is not on a heat source and also food does not need stirring as, for example, pasta does not stick together. It can also be used to keep food warm in saucepans once cooked.
