## Applications for Patents From 30/10/2018 to 12/11/2018

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. In the case of a Convention application the Convention country and priority date(s) claimed are given in square brackets and where an application claimed the priority of an earlier application filed at the office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

## Patents Granted Under Section 34

The number of a patent is given in heavy type; the letter S preceding the number indicates a short-term patent. The code numbers following the title of each invention are those of the International Patent Classification. The date of filing the application follows the proprietor's name. The patent application number, which follows the date of application in parenthesis, has been superseded by the patent number. In the case of an application claiming the priority of an earlier application, the name of the country where the earlier application was made and the date of the earlier application are shown in square brackets.

By virtue of Section 65(3), the application relating to any short-term patent appearing in the following list whose date of filing is later than the date which is 18 months prior to the date of this issue of the Journal becomes open to public inspection as and from the date of this issue of the Journal.

- 86941** Dual and negative pressure wound therapy dressings for the prevention and management of tissue fluid, seroma and lymphoedema. Int. Cl. (2018.01) **A61F 13/00; A61M 1/00; A61L 15/00**. MICHAEL SUGRUE 27 May 2014 (20140129)
- 86942** A device for the passage of a volume of fluid. Int. Cl. (2018.01) **F24H 1/00; F24H 9/00**. NORCROS GROUP (HOLDINGS) LIMITED 30 January 2014 (20140025) [United Kingdom-01 February 2013]
- S86943** A foundation and rising wall insulated construction system. Int. Cl. (2018.01) **E02D 5/00; E02D 7/00; E02D 27/00; E04B 1/00; E04B 2/00**. Z THERM LTD. 24 May 2017 (S20170112)

## Patents Granted Under European Patent Convention Designating Ireland

The Irish serial number appears first followed, respectively, by the proprietor's name, the date of filing of the application, the filing number and the European Patent Office publication number.

If the specification of the European patent was published in French or German the word 'French' or 'German', as appropriate, will appear as the last item of information.

The telescopic "C" shape slidable funnel relates to liquid refillable reservoirs. This unique design of Telescopic "C" shape slidable funnel makes it very compact in folded position and a wide liquid fill in area in open position. It has two outflow connectors at the bottom part of funnel. The C shaped design allows it to be used in any angle that is needed for manufacturers refillable reservoirs as the funnels shape is part of round shape. It can be used inside of the reservoir or can be used separated from the reservoir with a pipe connection.
