Official Notice

New Patent & SPC e-filing system is now available

The Patents Office is pleased to announce the launch of our new Patent & Supplementary Protection (SPC) e-filing facility. This new development, became available on 1 August 2019, to facilitate the filing of all Patent & SPC applications on-line via the Patents Office website home page. It will also be possible to file an online application for an Extension of the Duration of an SPC.

The new e-filing system introduces an easy to navigate online application form and makes provision for the uploading of all patent specification documentation. The e-filing functionality also facilitates the electronic payment of patent & SPC filing and application fees by credit or debit card. Automatic error checking helps ensure that users input the correct data and a fee counter provides information on the cost of the application. The submission process is straightforward and results in an online confirmation receipt that includes a provisional application number which can be printed or saved.

In addition, the Office has developed a stand-alone online tool to assist applicants with their patent documents called the Patent Specification Template Tool. This tool is a template which assists applicants in correctly constructing the documents that form part of the patent specification. This is also accessible via the website home page.

The introduction of the Patent and SPC e-filing means that the Patents Office can now accept online applications for all IP Rights, including trade marks and designs.

Applications for Patents From 24/06/2019 to 31/07/2019

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. In the case of a Convention application the Convention country and priority date(s) claimed are given in square brackets and where an application claimed the priority of an earlier application filed at the office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

Patents Granted Under Section 34

The number of a patent is given in heavy type; the letter S preceding the number indicates a short-term patent. The code numbers following the title of each invention are those of the International Patent Classification. The date of filing the application follows the proprietor's name. The patent application number, which follows the date of application in parenthesis, has been superseded by the patent number. In the case of an application claiming the priority of an earlier application, the name of the country where the earlier application was made and the date of the earlier application are shown in square brackets.

By virtue of Section 65(3), the application relating to any short-term patent appearing in the following list whose date of filing is later than the date which is 18 months prior to the date of this issue of the Journal becomes open to public inspection as and from the date of this issue of the Journal.

Patents Granted Under European Patent Convention Designating Ireland

The Irish serial number appears first followed, respectively, by the proprietor's name, the date of filing of the application, the filing number and the European Patent Office publication number.

If the specification of the European patent was published in French or German the word 'French' or 'German', as appropriate, will appear as the last item of information.

Surrender of Registered Trade Mark(s) - Rule 36 of 1996 Trade Mark Rules

- 219495 Class 7. Transmissions for transmitting torque on, sea and air; transmissions for machines and electrical inputs; transmission and clutches for machine tool and mechanical engineering sectors; gear shift units, gear pre-selectors, automatic shift units, synchroniser rings and synchronisers for manual transmissions; hydrodynamic torque converters; open and closed-loop control systems for transmissions; transmissions for industrial robots and machine tools; planetary gears for hydrostatic and

electrical drives; elevator gears, transmissions and drive units for lifting equipment; hydraulic pumps and motors, clutches, one-way and/or free-wheel clutches, wheels, brakes, magnetic and electromagnetic operated brakes and clutches; pressure cylinders, valves, flow indicators; spur gears, worm gears and worms, bevel gears, gear racks, crown gears, ring gears; rolling-in machine for cone shaped rolling in or cylindrical rear-roller; machine tools for production and machining of gears; gear planers, gear shaving machines, gear hobbing machines, grinding machines, tools for use with these machine tools, separating equipment for the production of gears and splines; machines and electrical and mechanical appliances for testing of gears to check precision of finished product and in relation to running noises; engine and transmission mountings; transmission equipment for helicopters, aircraft and airships; helicopter rotor blade setting unit, main and tail rotor transmissions for helicopters; rotary actuators for aircraft; reversing gears and step-up gears for marine craft; elevator transmissions; universal joints; hydraulic pumps; all included in Class 7; parts and fittings for all the aforementioned goods. 9. Material test machines and material test appliances; testing and inspection apparatus; test appliances and appliances to test steering, power tools, vehicles and gears, machines to break in transmissions, appliances for measuring road speed, appliances for measuring torque; all goods included Class 9; parts and fittings for all the aforementioned goods. Software relating to electronic and hydraulic operating systems for land, air and marine transmissions and vehicles intended for the agricultural and construction sectors. 12. Transmissions for transmitting torque on land; manual transmissions for cars, trucks, buses and other vehicles; automated mechanical transmissions for cars, trucks, buses, special vehicles and rail vehicles; automatic transmissions and continuously variable automatic transmissions for cars, trucks, buses and special vehicles; transfer boxes integrated into automatic transmissions; mechanical and hydrostatic variators for ratio adjustment of continuously variable

automatic transmissions; powershift transmissions for trucks, buses, special vehicles and rail vehicles; hydrostatic and hydronamic powershift transmissions for vehicles, synchromesh and powershift transmissions for farm tractors; electronic and hydraulic operating and control systems for land, air and marine transmissions and vehicles intended for the agricultural and construction sectors; transmission equipment and continuously variable power-splitting transmissions for self-propelled agricultural, working and construction equipment; transfer boxes for cars, trucks and special vehicles with and without four wheel drive (4WD); power take-off units to drive auxiliary equipment; limited-slip and locking differentials for cars, trucks, special vehicles and self-propelled off-road vehicles; gear shifts units, gear pre-selectors, automatic shift equipment; synchroniser rings and synchronisers for manual transmissions; power assistance units for gear shifts; integrated hydraulic and electronic transmission control units; shift strategies for the control of gear changes in multi-ratio automatic transmissions; operating strategy devices for adjusting ratios in continuously variable automatic transmissions; hydrodynamic torque converters; superimposed steering gears, control units for superimposed steering gears, transmission units for tracked vehicles; electric, electromechanical and electro-hydraulic drives and drive systems and hybrid drives for cars, trucks, buses and special vehicles; hub drive systems and wheel drives; drive units for rail vehicles; vehicles drives for off-road vehicles; planetary gears for hydrostatic and electrical drive units; transmissions for industrial fork lift trucks, transmissions and drives for lifting equipment; mechanical, hydraulic, elector-hydraulic and power-assisted steering and steering systems for cars, trucks, buses, agricultural and off road vehicles, mobile cranes, special vehicles, tracked vehicles and all types of self-propelled off-road vehicles; steering accessories, angle drives, steering columns, steering pumps, oil containers, valves, power cylinders for steering; operation and control units for power

assisted steering and steering systems; steer-by-wire systems; torque, torsion angle, steering speed, steering acceleration, rotor position sensors; worm transmissions for steering; fixed and adjustable steering columns, steering brakes, steering valves, steering intermediate gears; clutches, one-way and/or free-wheel clutches, wheels, brakes; torsional vibration damping systems; axles, axle systems and axle drives for cars, trucks, buses, agricultural, forestry and construction vehicles, cranes and special vehicles, industrial fork lift trucks, rail vehicles; wheel and axle guiding systems, track rods, wheel suspensions, wishbones; chassis components for all types of vehicle; equipment for roll stabilisation and for level control; pressure cylinders, valves, flow indicators; separate and integrated primary and secondary retarded brake systems for trucks, buses, special vehicles and rail vehicles; starter motors, alternators and integrated starter motor/alternator units; spur gears, worm gears, worms and worm gearing, bevel gears, gear racks, ring gears; engine and transmission mountings; all included in Class 12; parts and fittings for all the aforementioned goods. 37. Maintenance, servicing and repair services in connection with the aforementioned goods in Classes 7, 9 and 12 and in connection with their component parts.

220426 Class 7. Transmissions for transmitting torque on, sea and air; transmission for machines and electrical inputs; transmissions and clutches for machine tool and mechanical engineering sectors; gear shift units; gear pre-selectors, automatic shift units, synchroniser rings and synchronisers for manual transmissions; hydrodynamic torque converters; open and closed-loop control systems for transmissions; transmissions for industrial robots and machine tools; planetary gears for hydrostatic and electrical drives; elevator gears, transmissions and drive units for lifting equipment; hydraulic pumps and motors, clutches, one-way and/or free-wheel clutches, wheels, brakes, magnetic and electromagnetic operated brakes and

clutches; pressure cylinders, valves, flow indicators; spur gears, worm gears and worms, bevel gears, gear racks, crown gears, ring gears; rolling-in machine for cone shaped rolling in or cylindrical rear-roller; machine tools for production and machining of gears; gear planers, gear shaving machines, gear hobbing machines, grinding machines, tools for use with these machine tools, separating equipment for the production of gears and splines; machines and electrical and mechanical appliances for testing of gears to check precision of finished product and in relation to running noises; engine and transmission mountings; transmission equipment for helicopters, aircraft and airships; helicopter rotor blade setting unit, main and tail rotor transmissions for helicopters; rotary actuators for aircraft; reversing gears and step-up gears for marine craft; elevator transmissions; universal joints; hydraulic pumps; all included in Class 7; parts and fittings for all the aforementioned goods.

9. Material test machines and material test appliances; Testing and inspection apparatus; test appliances and appliances to test steering, power tools, vehicles and gears, machines to break in transmissions, appliances for measuring road speed, appliances for measuring torque; all included Class 9; parts and fittings for all the aforementioned goods, software relating to electronic and hydraulic operating systems for land, air and marine transmissions and vehicles intended for the agricultural and construction sectors.

12. Transmissions for transmitting torque on land; manual transmissions for cars, trucks, buses and other vehicles; automated mechanical transmissions for cars, trucks, buses, special vehicle and rail vehicles; automatic transmissions and continuously variable automatic transmissions for cars, trucks, buses and special vehicles; transfer boxes integrated into automatic transmissions; mechanical and hydrostatic variators for ratio adjustment of continuously variable automatic transmissions; powershift transmissions for trucks, buses, special vehicles and rail vehicles, hydrostatic and hydronamic powershift transmissions for vehicles, synchromesh and powershift transmissions for farm

tractors; electronic and hydraulic operating and control systems for land, air and marine transmissions and vehicles intended for the agricultural and construction sectors; transmission equipment and continuously variable power-splitting transmissions for self-propelled agricultural, working and construction equipment; transfer boxes for cars, trucks and special vehicles with and without four wheel drive (4WD); power take-off units to drive auxiliary equipment; limited-slip and locking differentials for cars, trucks, special vehicles and self-propelled off-road vehicles; gear shifts units, gear pre-selectors, automatic shift equipment; synchroniser rings and synchronisers for manual transmissions; power assistance units for gear shifts; integrated hydraulic and electronic transmission control units; shift strategies for the control of gear changes in multi-ratio automatic transmissions; operating strategy devices for adjusting ratios incontinuously variable automatic transmissions; hydrodynamic torque converters; superimposed steering gears, control units for superimposed steering gears, transmission units for tracked vehicles; electric, electromechanical and electro-hydraulic drives and drive systems and hybrid drives for cars, trucks, buses and special vehicles; hub drive systems and wheel drives; drive units for rail vehicles; vehicles drives for off-road vehicles; planetary gears for hydrostatic and electrical drive units; transmissions for industrial fork lift trucks, transmissions and drives for lifting equipment; mechanical, hydraulic, elector-hydraulic and power-assisted steering and steering systems for cars, trucks, buses, agricultural and off road vehicles, mobile cranes, special vehicles, tracked vehicles and all types of self-propelled off-road vehicles; steering accessories, angle drives, steering columns, steering pumps, oil containers, valves, power cylinders for steering; operation and control units for power assisted steering and steering systems; steer-by-wire systems; torque, torsion angle, steering speed, steering acceleration, rotor position sensors; worm transmissions for steering; fixed and adjustable steering columns, steering

brakes, steering valves, steering intermediate gears; clutches, one-way and/or free-wheel clutches, wheels, brakes; torsional vibration damping systems; axles, axle systems and axle drives for cars, trucks, buses, agricultural, forestry and construction vehicles, cranes and special vehicles, industrial fork lift trucks, rail vehicles; wheel and axle guiding systems, track rods, wheel suspensions, wishbones; chassis components for all types of vehicle; equipment for roll stabilisation and for level control; pressure cylinders, valves, flow indicators; separate and integrated primary and secondary retarded brake systems for trucks, buses, special vehicles and rail vehicles; starter motors, alternators and integrated starter motor/alternator units; spur gears, worm gears, worms and worm gearing, bevel gears, gear racks, ring gears; engine and transmission mountings; all goods included in Class 12; parts and fittings for all the aforementioned goods. 37. Maintenance, servicing and repair services in connection with the aforementioned goods in Class 7, 9 and 12 and in connection with their component parts.

Application to Alter Trade Mark(s) Registered under the 1996 Act

260193 Class 25. Jeanie Wellbeing Limited
The mark in the proposed altered form, is as shown hereunder:

Any person desiring to oppose the application must give Notice of opposition to the Controller in accordance with rule 35(2) of the 1996 Rules within three months of the date of this Journal issue.

Trade Marks Restored to the Register under Rule 40 of the 1996 Rules

242376 Cl. 3. DEVA CONCEPTS LLC.

International Registrations under the Madrid Protocol seeking protection in the State.

Any person desiring to oppose the conferring of protection in the State to the undermentioned marks may, within three months from the date of this Journal give notice to the Controller, Patents Office, Government Buildings, Hebron Road, Kilkenny, in accordance with the provisions of Rule 18.

It should be noted that under the provisions of Rule 63(2) no extension of the opposition period is allowed for lodging opposition under Rule 18.
