Applications for Patents

From 21/09/2020 to 07/10/2020

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. In the case of a Convention application the Convention country and priority date(s) claimed are given in square brackets and where an application claimed the priority of an earlier application filed at the office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

Wrist and waist bands are made from hook and loop tape. Since nail biting is often the result of involuntary and unconscious hand-to-mouth tendencies, willpower is unable to assist in breaking this habit. Worn strategically, the wrist and waist bands inhibit and signal such hand actions alerting willpower to play a decisive role in ending the habit and enabling the growth of beautiful strong healthy nails.
