## Applications for Patents From 14/07/2023 to 26/07/2023

The names of applicants are in alphabetical order. In the case of joint applicants, each name is given independently. The title of the invention should not be regarded as an exhaustive indication of the subject-matter. The date immediately following the title is that on which the application was filed; in the case of a divisional application, the filing date of the earlier application is added within parentheses. Where an application has been filed pursuant to Section 127A, the filing date shall be either the date of the originating PCT filing, where applicable, or the date directed by the Controller. Where the application invokes the Paris Convention, the Convention country and priority date(s) claimed are given in square brackets. Where an application claimed the priority of an earlier application filed at this Office, this information is given within the square brackets. The number is that of the application and should be used for correspondence purposes up to the date of grant of a patent. The letter S preceding the number indicates that the application is for a short-term patent. A new number will be given when a patent is granted and this new number should be quoted in all correspondence subsequent to grant.

## Patents Granted Under Section 34

The number of a patent is given in heavy type; the letter S preceding the number indicates a short-term patent. The code numbers following the title of each invention are those of the International Patent Classification. The date of filing the application follows the proprietor's name. The patent application number, which follows the date of application in parenthesis, has been superseded by the patent number. In the case of an application claiming the priority of an earlier application, the name of the country where the earlier application was made and the date of the earlier application are shown in square brackets.

By virtue of Section 65(3), the application relating to any short-term patent appearing in the following list whose date of filing is later than the date which is 18 months prior to the date of this issue of the Journal becomes open to public inspection as and from the date of this issue of the Journal.

## Patents Granted Under European Patent Convention Designating Ireland

The Irish serial number appears first followed, respectively, by the proprietor's name, the date of filing of the application, the filing number and the European Patent Office publication number.

If the specification of the European patent was published in French or German the word 'French' or 'German', as appropriate, will appear as the last item of information.

Our ROLLAER Children's Suitcase is an innovative suitcase with two foam Roller's designed into the base of the suitcase. This allows for secure comfortable travel and movement of travel items and also allows children to ride on the suitcase being self propelled or pulled along by an adult via a tethering cord. This unique design is very robust and is a vast improvement on conventional Children's suitcases with standard wheels that can get easily damaged during transportation. The unique integration of the design of the foam roller's within the suitcase also allows for easy stowage in aeroplanes and demonstrates a vastly improved Children's suitcase design. This robust engineering is further emphasized in the industrial design of the suitcase.

Wooden rotating stand for up to four wind chimes. Made of 5 pieces. The base is a solid conical form with a slight curve in its profile. The central form is made two identical tapering solid posts assembled so that they mirror each other, thinner sections centrally. The upper section for the chimes to hang off is solid and has four tapering elements, this element rotates and one could describe as being a cut out from a discus shape. The top section is a large solid button form to aesthetically finish the piece. The elements are pieced together using metal male and female screws and nuts permanently inserted into the wood.

## International Registrations under the Madrid Protocol seeking protection in the State.

Any person desiring to oppose the conferring of protection in the State to the undermentioned marks may, within three months from the date of this Journal give notice to the Controller, in accordance with the provisions of Rule 18.

It should be noted that under the provisions of Rule 63(2) no extension of the opposition period is allowed for lodging opposition under Rule 18.

It is desirable before lodging formal opposition that a communication should be addressed to the holder affording him an opportunity to withdraw his application for protection of the International Registration in the State. In this way cost of opposition proceedings may be avoided.
